Matias Facello

I am a young man who thinks of a solution for every problem, always trying to find the best method to achieve it. Efficiency, compromise, and order are the most valuable keywords in my life.
Computers were always a big part of my life, and I love working with them. I learned to write code as a hobby, but now I believe I am ready to be a professional.
My wish is to work with a company to grow as a professional and improve my skills. In return, I offer all my commitment and the best of my qualities.

Experience

Freelance Web Development
2020 Jun - Present
Starting as a small hobby, I designed multiple webs and graphics projects.

Website example: *FM Zurich* ([link](#))
Tech used: HTML, CSS, JS, PHP, MySQL, AJAX.
Description: Website of a local radio, having the radio streaming and some news RSS feed of multiple newspapers of the country.

Graphic Design example: *Cartagena Menu* ([link](#))
Tech used: Adobe Photoshop.
Description: Cartagena is a local food store. Logo, Brochures and Wall boards were made making a rustic but modern stetic for the shop.

Education

Self-taught Web Development
2018 - Present
Escribe aquí tu texto Escribe aquí tu texto Escribe aquí tu texto Escribe aquí tu texto Escribe aquí tu texto Escribe aquí tu texto.

Udemy, MERN Stack Front To Back: Full Stack React, Redux & Node.js
2019 Jan
([Link](#)) - Course from Brad Traversy. In this course I learned more in depth the workflow and standard practices to combine different technologies, integrating them to make a complete application.

Udemy, Object Oriented PHP & MVC
2018 Aug
([Link](#)) - Course from Brad Traversy. This course was important to understand the importance and logic behind objects, and how to have a better workflow using MVCs.
